

HYGIENE KIT'S DISTRIBUTION ACTIVITY REPORT

June- July, 2022

Reported By

Afreen Athar, Moawin Foundation

Report: Hygiene Kits Distribution

During puberty, children faced lots of physical and psychological challenges due to hormonal changes. During this age, it is important that young girls must be given awareness on how to deal with them in a healthy manner. Keeping this aspect under consideration, our prestigious Donor Ms. Anber Mehal from Care4Women, USA donated an amount of Rs. 50,000/- to gift health and hygiene kits to 30 girl students during the 3-month time-line. The activity on Hygiene and health was conducted on **15th June, 2022** with a comprehensive session on what are the challenges girls faced during their puberty and how they can take measures for a healthy lifestyle.

Afterwards, 30 hygiene kits were distributed among **30 girls** from **Islamabad Model College for Girls (IMCG), Punjgran** by the guests during this month. The guests really appreciated Moawin Foundation's efforts in educating children through provision of an effective school environment as well as inculcating life skills education in schools.

The activity has been successfully conducted in the selected school and same kits with same students have been distributed during the month of July through Moawin Foundation. School Head appreciated this initiative for the girls and shared that such initiatives are really fruitful in supporting humanity. Moawin Foundation will cover the last phase during the month of August.
